Rosval: the number-one producer of commercial kitchens for the culinary industry

More than 45 years ago, the first Rosval commercial range for the hospitality industry was produced in our factory in Best, the Netherlands. Since then, our family business has grown into the leading producer of commercial kitchens for the culinary and hospitality industries as well as institutions.

MISSION

Rosval has been at the forefront of the development, production, supply, and installation of stainless-steel products for commercial kitchens for many years. **Quality and bespoke solutions are guaranteed!** Rosval's strength is that we **manually manufacture everything exactly** according to the client's wishes. We combine this customized approach with **many years of experience and an eye for detail** to create the perfect concept for your kitchen.

VISION

As one of our clients, **your expectations will be exceeded.** We work exclusively with qualified professionals, which guarantees that our clients' expectations are exceeded time and time again. This **exceptional level of craftsmanship and experience** is evident in each product produced by Rosval. Our passion is reflected in the commercial kitchen products we produce. With all the required disciplines in-house and short lines of communication, we take care of the entire project from start to finish.

What makes Rosval unique

Everything is designed, produced, and installed exclusively for you.

A family business with more than 45 years of experience.

The best commercial kitchen technology means less maintenance and replacement costs.

RANGES

We are passionate about producing customized ranges for commercial kitchens in the hospitality industry! The Rosval range can be manufactured as an island or as a wall mounting. At Rosval, you can choose from many options to have your range made exactly according to your needs and wishes.

COOKING

Cooking can be done in many ways. This strongly depends on the chefs wishes. Because of this, Rosval has a wide range of induction products, such as induction hobs, griddles, and hot plates. Our induction wok is a beautiful example of how diverse induction cooking can be. But of course: Rosval also has several possibilities for chefs who prefer to cook on gas. For these chefs, Rosval has a wide range of gas burners. The open gas burners are available with stainless steel or enamelled cast-iron pan support (gas range).

REFRIGERATION

Rosval is a leader in the innovative development of refrigeration systems and applications for refrigerated workbenches, as well as refrigerated prep station workbenches for commercial kitchens in the hospitality industry. Thanks to the customization Rosval offers, you can achieve major savings on your cleaning, energy, and maintenance costs. We have built the most innovative techniques into Rosval's refrigeration and cooling systems.

It is our mission to produce beautiful products with love and passion.

Discover our core values...

Customization

Rosval creates bespoke kitchens based on your ideas, wishes, and needs.

Craftsmanship

Rosval works exclusively with qualified professionals.

Quality that lasts

Rosval only works with first-class peripheral equipment and the best commercial kitchen technology. Our appliances are energy-efficient, less harmful to the environment, and significantly reduce costs.

Guarantee

Rosval always carries out quality control during and after the production process and offers a ten-year guarantee on your Rosval construction.

Premium service

Rosval has its own technical service department for assembly, service, and maintenance to support you whenever needed.

Innovation

Rosval is committed to becoming a trend setter in the sector and to always meet the latest wishes and requirements of the modern kitchen.

Rosval product innovations

Innovation in commercial-kitchen technology is an important element for Rosval. Rosval is committed to maintaining its leadership position in the sector and is therefore continuously working on new product innovations.

ROSVAL EASY-COOLING®

Rosval has developed an innovative, patented sealing system for your commercial kitchen refrigeration that replaces the old rubber seal. This means a considerable improvement in hygiene, time savings on cleaning costs, and also a considerable cost saving because the rubbers no longer need to be routinely replaced.

ROSVAL FRYER®

Rosval has developed a unique, fully automated oil filtration system in which the filter system is controlled at the push of a button. The automatic grease filter installation features separate discharge and return pipes. This ensures that contaminated and filtered grease never interact. The filter system is equipped with a very fine stainless-steel filter over which filter powder is sprinkled. By pumping the oil around for five minutes, there is an optimal contact time with the filter powder, which removes even the smallest dirt particles in the oil.

Your recipe, is our bespoke solution

This means that we do not have kitchens ready for installation. Everything is designed, produced, and installed exclusively for clients such as yourself. In other words, no two Rosval kitchens are the same.

SERVICE

From the first moment of contact through the design phase, delivery, and assembly, Rosval stands out because of its exceptional hospitality mindset. We think ahead, make good on our promises, exceed expectations, and most of all consult with you. We do this by using both 2D and 3D designs and providing clear product descriptions as well as specified prices.

LIVE-COOKING BUFFET STATIONS

Rosval is a leading specialist in the design and production of Live-Cooking Buffet stations. Rosval's Live-Cooking Buffet stations can be seen in many local and international hotels. Live-Cooking buffet stations can be provided with options such as Cool-Spot to ensure that sensitive products are kept fresh in a unique way. We also offer the option to create Live-Cooking Buffet stations within your own look and feel.

STAINLESS STEEL À LA CARTE

Customized stainless-steel products are our speciality. Rosval is known as the stainless-steel manufacturer of durable products. We always carry out strict quality controls during and after the production process and offer a ten-year guarantee on our construction. As a result, you are assured of durable quality.

Rosval Experience Centre Best (NL)

In addition to our factory in Best, we also have the Rosval Experience Centre.

Rosval Experience Centre Antwerp (BE)

Our brand-new Experience Centre in the Belgian city of Antwerp will be open from March 2022!

Your own professional kitchen as an Experience Centre!

The Rosval Experience Centre is a kitchen showroom filled with Rosval craftsmanship complete with live cooking demos. We offer you the unique opportunity to test and experience our equipment for commercial kitchens – and you can even follow a cooking workshop.

If you want to experience Rosval's kitchen products yourself, feel free to visit us at our Experience Center! You can contact us below to make an appointment.
